SKILLS

Client	HTML5, CSS3, Bootstrap, JavaScript (ES6+), Jquery.js, React.js
Server	Node.js, Express
Database	MySQL, MongoDB
Other	Express Handlebars, EJS, ORMs, JSON, Git/ Github RESTful APIs

SUMMARY

Full Stack Web Developer with a certificate in Web Development via Carleton University's Coding Bootcamp and a Bachelor of Science with a Specialization in Biochemistry from the University of Ottawa. Exceptional problem solving skills, able to thrive in a team environment and a strong desire to learn. Technical abilities include: creating responsive and interactive user interfaces, using RESTful APIs, setting up servers, retrieving data from SQL and NoSQL databases and many more.

PROJECTS

Travelbook   Live Site   Github Repo

Travelbook is a full-stack application which allows users to create an account and post about their travel experiences. Some other features include: editing and deleting posts, updating your profile, and connecting with nearby travellers. This project was developed with semantic UI, EJS, Node.js, Express, Sequelize and MySQL.

COVID-19 Tracker   Live Site   Github Repo

The COVID-19 Tracker retrieves the latest data regarding cases of COVID-19 and displays a graphical representation. It also provides the user with the most recent news updates. This was all done with MaterializeCSS, HTML5, JavaScript, Chart.js, an open source COVID-19 API, and the New York Times API.

Employee Tracking CLI   Github Repo

This is a command line tool that allows the user to track employees regarding their role, department and manager. The user can select from a variety of options to update information in the database. The Employee Tracking CLI was created with Node.js and MySQL.
